## **Company Description**

Verano Holdings Corp. operates as a vertically integrated multi-state cannabis operator in the United States. The company engages in the cultivation, processing, wholesale, and retail distribution of cannabis in Arizona, Arkansas, Connecticut, Florida, Illinois, Maryland, Massachusetts, Michigan, Nevada, New Jersey, Ohio, Pennsylvania, and West Virginia. It offers cannabis products under the Encore, Avexia, MUV, Savvy, BITS, and Verano brands for medical and adult-use markets. The company is headquartered in Chicago, Illinois.

# **Rating Methodology**

After carefully evaluating a company's financial health, operational efficiency, and growth prospects through various analyses, we culminate our assessment by assigning a rating of "Buy," "Hold," or "Sell." This rating is determined based on the company's performance compared to its peers, alongside an examination of its valuation. A "Buy" rating suggests the company outperforms its competitors and is undervalued or poised for growth, indicating a good investment opportunity. A "Hold" rating implies the company is performing on par with industry standards, and its current valuation accurately reflects its market position and prospects, suggesting investors should maintain their positions without adding more. A "Sell" rating is given if the company underperforms relative to its peers or is overvalued, indicating a potential decline in value and advising investors to divest. This systematic approach helps investors make informed decisions by understanding a company's relative standing in its sector and potential for future performance.

### **Report Process**

We have established a process for analyzing multi-state cannabis operators, which we will outline in this section before discussing specific details regarding Verano Holdings Corp. (Verano)

### **Establish Comparables**

First, we looked for public company US multi-state operators in a similar size range as Verano. We started the search by considering all AdvisorShares Pure US Cannabis MSOS ETF holdings. The AdvisorShares Pure US Cannabis MSOS ETF has twenty-one companies with market capitalization between \$37M and \$3.45B USD. This is too extensive of a range, so we split the benchmark into multi-state operators above and below \$500M in market capitalization.

Using this process, we identified five other cannabis multi-state operators with market capitalizations between \$627M and \$3.45B USD. We feel that this makes for a robust comparable benchmark.

### **Understanding the Industry and Catalysts**

Next, we aim to validate the fundamental underlying macro drivers for the industry independently. We will predict the expected growth rates for all six companies in the benchmark.

### **Understanding the Company and Future Catalysts**

We will then review the company's primary thesis and strategic plan and determine if we feel the growth thesis of the company is strong and the likelihood of management being able to executive on it.

### **Establish KPIs**

We have set Key Performance Indicators (KPIs) to compare the company against a custom benchmark of other companies. Our analysis will include the three financial statements as metrics for valuation compared to the benchmark.

#### **KPI Results**

Next, we compare and rank the company against its peers across each category. The comparison will include a ranking of the average and median to provide an accurate picture of the company's performance. It is possible that in some categories, all the companies have performed well collectively, and scoring low could still be a good result, conversely with poor overall performance.

### **Valuation Analysis**

Next, we will apply traditional discounted cash flow and comparative valuation methods.

### Our Take

Ultimately, we will analyze all the information gathered and conclude whether we recommend the company as a Buy, Hold, or Sell. We will also provide our target valuation for the company.

# **Executive Summary**

TDR Research is initiating coverage of Verano Holdings Corp with a "Buy" rating. We have determined a fair value of \$10.08, offering a potential upside of 145% from its current price of \$4.05. Our estimates for 2024 include a projected revenue of \$933.1 million, a gross margin percentage of 51.5%, an EBITDA margin of 29.5%, and an EBITDA of \$275.2 million.

The company excels in free cash flow growth, with a significant increase over the last twelve months. Verano's gross profit margin is above the median and average of its peers, reflecting effective cost management and profitability. The company's financial stability is also evident in its lower total liabilities vs. assets ratio, indicating better financial health and lower leverage compared to its competitors.

#### Strengths of Verano Compared to Its Peers

Verano demonstrates strong financial stability with a lower total liabilities vs. assets ratio. The company's gross profit margin is above the median and average of its peers, reflecting effective cost management and profitability. Verano also excels in cash flow management, with a Levered Free Cash Flow Margin above the benchmark, showcasing its financial flexibility and operational efficiency. Additionally, Verano's long-term growth rate for EBITDA is significantly above the benchmark median and average, indicating robust operational efficiency and profitability.

#### **Weaknesses of Verano Compared to Its Peers**

Verano faces challenges with its current ratio, which is below the benchmark median and average, indicating potential liquidity issues in meeting short-term liabilities. Additionally, the company's SG&A margin is slightly higher than the median and average, with room for improvement in operational efficiency. Verano's CapEx Margin is also lower than its peers, suggesting conservative reinvestment that may impact future growth.

#### **Our Forecasts**

Based on our analysis, we rate Verano Holdings Corp as a "Buy" with a fair value price of \$10.08, offering a potential upside of 145% from its current price of \$4.05. This valuation considers the company's strengths in free cash flow growth and the future catalysts of regulatory changes. These factors indicate a promising return on investment for shareholders. Verano's strong financial health, effective cost management, and operational efficiency make it a compelling investment opportunity in the cannabis industry.

# **Establish Benchmark Comparables**

Using this process, we identified five other cannabis multi-state operators with market capitalizations between \$627M and \$3.45B USD. These companies are holdings in the AdvisorShares Pure US Cannabis MSOS ETF. We feel that this makes for a robust comparable benchmark. Four companies are close in size with the range of \$1.39B and \$3.46B USD; the two others are close at \$627M and \$669M. Ideally, there would be more companies closer in size, but in this case, it was better to compare six companies to each other than two or four.

COMPARABLE COMPANY	US TICKER	FOCUS	MC USD \$M

Trulieve Cannabis	OTC:TCNNF	US Cannabis MSO	\$1949
Verano Holdings	OTC:VRNOF	US Cannabis MSO	\$1391

## **Understanding the Industry and Future Catalysts**

The main qualitative catalysts for cannabis that we noted are as follows:

- In the US, the population is becoming more favorable for the use of cannabis for both recreational and medical reasons. In the most updated survey by the Pew Research Center, dated March 26th, 2024, 88% of Americans feel that cannabis should be legal for medical or recreational use. This trend has been increasing each year, producing more demand each year for cannabis in the US.
- Additional US states have legalized cannabis at a state level for medicinal or recreational use. As of today, cannabis is legal in 38 of 50 states for medical use and in 24 states for recreational use. Each year, more US states transition into medical or recreational legal status.
- At the current time, cannabis is a Schedule 1 drug at the federal level. The President of the US announced on May 16th that his administration is progressing in rescheduling cannabis to Schedule 3, allowing for medical use federally. This would enable potentially 12 additional states to open for the medical use of cannabis and likely encourage additional states to legalize recreational use.

The quantitative forecast for cannabis growth in the US varies widely, but when combined as an average, the growth rate is substantially higher than the outlook for the broad US GDP growth.

- Technavio predicts a combined recreational and medical cannabis CAGR growth of 24.03% between 2022 and 2027.
- MJBiz predicts a combined recreational and medical cannabis growth rate of 11.26%, which they note is an estimate for the high end of the scale.
- Fortune Business Insights estimates the global cannabis market size is projected to grow from \$57.18 billion in 2023 to \$444.34 billion by 2030, at a CAGR of 34.03% during the forecast period.
- BDSA forecasts the total global legal cannabis industry is predicted to reach \$36.7 billion in 2023 (with 80% of sales from U.S. markets), growing at a compound annual growth rate (CAGR) of 13% from 2022 to 2027.
- Statista is an outlier with much more modest predictions; the revenue for the cannabis market in the United States is anticipated to demonstrate an annual growth rate (CAGR 2024-2029) of 2.89%. But Statista does show intriguing data comparisons for the US in 2024. The tobacco (\$108), beer (\$112), wine (\$39), and spirits (\$103) market in the US is a combined \$362B, whereas the legal cannabis market is only \$43 Billion. This shows how much potential cannabis has for growth compared to the already established markets.

Based on the qualitative and quantitative points above, the US combined recreational and medical cannabis market has strong winds behind its growth rates compared to the expected Real GDP growth long term in the US, which is around 2% plus an inflation target of 2% for a combined growth rate long term of 4%.

## **Understanding the Industry and Future Catalysts**

Verano Holdings Corp is a leading U.S. multi-state cannabis operator. The company was established in 2014 and operates in 13 states with a total of 140 retail locations and 14 production facilities spanning over 1 million square feet. Verano has a diverse portfolio of 12+ brands and serves around 700 active wholesale accounts. In 2023, employs over 3,900 people.

#### **2024 Objectives**

Verano aims to enhance its market presence, expand its retail and wholesale networks, and maintain financial discipline. The company plans to achieve growth through expansion of its retail footprint, focusing on strategic locations and customer experience. Additionally, Verano will expand its wholesale distribution to drive scale economies and reinforce its market position. The company is also committed to investing in its portfolio of brands, further diversifying product offerings to attract a broader customer base.

Zen Leaf aspires to be a leading cannabis retail brand, aiming for brand loyalty among a wide range of consumers as it continues to expand. The brand's mission is to inspire customers, meet important life needs, and offer innovative products that drive economic success and cultural influence in a crowded marketplace.

MÜV serves the Florida region with 74 state-of-the-art retail dispensaries. MÜV offers a wide selection of concentrates for patients needing micro-dosing options and in-house brands like MÜV, Verano Reserve, Savvy, and Sweet Supply. The knowledgeable and friendly staff are dedicated to helping meet the needs of medical patients.

1Q 2024 Retail vs. Wholesale Revenue Contribution: 66% Retail, 34% Wholesale

#### **Innovation Engine Fueling Growth**

In 2023, Verano launched over 70 new products, which contributed 47% to net revenue in the fourth quarter. The company continually evaluates new information and data to anticipate exciting and innovative product launches, reaching new consumer segments and driving growth.

#### **Growth Strategy**

- Grow Retail Footprint: Verano seeks to expand its retail presence strategically, focusing on location, traffic flow, and customer experience.
- Grow Wholesale Distribution: The company aims to scale its wholesale business to drive economic benefits and strengthen market presence.
- Expand House of Brands: Verano plans to diversify its product offerings and price points to attract a broader customer base.
- Disciplined M&A: Verano leverages its strong balance sheet to execute accretive and disciplined mergers and acquisitions across the cannabis ecosystem.

## **Understanding the Industry and Future Catalysts**

#### **Key Markets**

Verano's primary markets include Florida, Pennsylvania, and Arizona:

- Florida: Verano operates 75 dispensaries with a total cultivation and manufacturing capacity of 262,000 square feet. The market is expected to grow from \$2.6 billion in 2023 to \$4.3 billion in 2027.
- Pennsylvania: The company has 18 operational dispensaries and a 62,000 square foot cultivation and manufacturing facility in Chester. The market is projected to grow from \$1.1 billion in 2022 to \$1.9 billion in 2027.
- Arizona: Verano operates 6 dispensaries with a combined cultivation and manufacturing capacity of 62,000 square feet. The market is expected to grow from \$1.3 billion in 2023 to \$1.5 billion in 2027.

#### **Customer Experience and Innovations**

Verano prioritizes enhancing the customer experience through efficient service, loyalty programs, and innovative products. The company launched over 70 new products in 2023, contributing 47% to net revenue in the fourth quarter. Verano focuses on data-driven research and development to anticipate and meet customer needs, continually introducing new products to capture a wider consumer base.

#### **Recent Developments**

Recent developments include strategic additions to the executive team, expansion of retail locations, and significant financial moves to strengthen the balance sheet. Verano paid down \$50 million towards its senior credit facility and continues to maintain a strong cash position. The company is well-positioned to capitalize on potential regulatory changes, such as the rescheduling of cannabis to Schedule III, which would enhance its cash flow generation and provide significant investment opportunities.

#### **Strategic Vision**

Verano is preparing for the future of the cannabis industry by leveraging its scale, distribution networks, and technology platforms. The company aims to enhance convenience and personalized marketing while maintaining a strong presence in core markets. Verano's strategic vision includes disciplined mergers and acquisitions (M&A) to grow within states with high potential for adult-use legalization and to strengthen its market position.

We established Key Performance Indicators (KPIs) across three financial statements to evaluate a company's performance relative to its peers. We identified eight KPIs for the income statement to assess if the company is growing profitably. We looked at six KPIs for the balance sheet to determine the company's financial soundness. Finally, we considered four KPIs on the cash flow statement to ensure the company's cash flow aligns with its income statement performance. This comprehensive approach allows us to accurately gauge the company's overall financial health and growth potential.

# Financial Comparison – Income Statement

KPI		Income Statement – Revenue Growth		
Why it is in	mportant?	Revenue growth is crucial because it indicates the company's ability to increas sales over time, reflecting market demand and operational effectiveness. It help analysts assess the company's competitiveness and potential for futur profitability. Consistent revenue growth often correlates with stock pricincreases, making it an attractive metric for investors and a crucial factor considering if the company is required to raise additional capital.		
Peer Comp	parison	For KPI #1, Verano's revenue growth over the last twelve months (LTM) is 3.1%, which matches the benchmark median of 3.1% and is below the average of 11.1%. For KPI #2, Verano's 3-year compound annual growth rate (CAGR) for revenue is 60.1%, significantly above the benchmark median of 29.2% and the average of 34.9%.		
Take Away	y / Conclusion	These figures show that while Verano's recent revenue growth aligns with the median, its long-term growth rate is exceptionally strong compared to its peers, indicating robust performance over three years.

# **Valuation Analysis**

We use three primary valuation methods to determine a company's value: Discounted Cash Flow (DCF) growth, DCF Revenue, and EV/Revenue. Each method provides a different perspective on the company's financial health and potential. By blending these methods, we achieve a comprehensive and balanced valuation. This blended valuation helps ensure accuracy and reliability by smoothing out any anomalies or extremes from the individual methods. We then calculate the potential upside in the stock price by comparing this blended valuation to the current market price, offering insights into potential investment growth.

Discounted cash flow (DCF) growth calculates a company's value by estimating its future cash flows and discounting them to their present value using a discount rate. The process involves projecting the company's future cash flows, determining an appropriate discount rate, and applying this rate to the future cash flows to find their present value. The sum of these discounted cash flows represents the estimated value of the company.

Discounted cash flow (DCF) revenue valuation calculates a company's value by projecting its future revenue and estimating the resulting cash flows. These future cash flows are then discounted to their present value using a discount rate. The total of these discounted cash flows provides the estimated value of the company based on its expected revenue.

EV/Revenue valuation calculates a company's value by dividing its enterprise value (EV) by its annual revenue. Enterprise value is the total value of a company, including its market capitalization, debt, and cash. By comparing EV to revenue, this valuation metric assesses how much investors are willing to pay for each dollar of the company's revenue, providing insight into its market valuation relative to its sales.

After calculating the valuations using these three methods, we blend them into a single valuation price to get a comprehensive estimate. This blended valuation helps smooth out any anomalies or extremes from individual methods, providing a balanced perspective. Finally, we calculate the potential upside in the stock price by comparing the blended valuation to the current market price, indicating the potential for investment growth.

Current Price	\$4.05
Discounted Cash Flow Growth Valuation	\$13.06
Discounted Cash Flow Revenue Valuation	\$10.63
EV / Revenue Valuation	\$6.56
Blended Fair Value	\$10.08
Potential Upside	145%

# Our Take

We rate Verano Holdings Corp as a "Buy" due to its strong financial health and growth potential. One of the main positive highlights is Verano's exceptional Levered Free Cash Flow Growth, which significantly outpaces its peers. Additionally, the anticipated rescheduling of cannabis to Schedule III presents a significant future catalyst for growth.

#### Strengths of Verano Compared to Its Peers

Verano demonstrates strong financial stability with a lower total liabilities vs. assets ratio, indicating better financial health and lower leverage. The company's gross profit margin is above the median and average of its peers, reflecting effective cost management and profitability. Verano also excels in cash flow management, with a Levered Free Cash Flow Margin above the benchmark, showcasing its financial flexibility and operational efficiency.

#### **Weaknesses of Verano Compared to Its Peers**

Verano faces challenges with its current ratio, which is below the benchmark median and average, indicating potential liquidity issues in meeting short-term liabilities. Additionally, the company's SG&A margin is slightly higher than the median and average, with room for improvement in operational efficiency. Verano's CapEx Margin is also lower than its peers, suggesting conservative reinvestment that may impact future growth.

#### **Our Forecasts**

Based on our analysis, we rate Verano Holdings Corp as a "Buy" with a fair value price of \$10.08, offering a potential upside of 145% from its current price of \$4.05. This valuation considers the company's strengths in free cash flow growth and the future catalysts of regulatory changes. These factors indicate a promising return on investment for shareholders.
